Rajneesh Kumar

React Native Engineer — High-Performance, AI driven Mobile Apps (5+ Years)

India | Open to Hybrid/Remote | +91 9808532935 | rajneesh.kumar.work@gmail.com | linkedin.com/in/rajneeshkumar94

PROFESSIONAL SUMMARY

React Native Engineer with 5+ years of experience delivering secure, scalable, and high-performance mobile applications for enterprise and product-based environments. Specialized in React Native (bare workflow), advanced state management, mobile security (SSL pinning, root/jailbreak detection), and CI/CD automation. Known for reducing crashes, improving performance, increasing user retention, and shipping features at startup speed with enterprise reliability. Currently exploring **Generative AI integrations** (OpenAI, LLM-based features) to build next-gen intelligent mobile experiences."

CORE TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Mobile: React Native (Bare), React.js, New Architecture (Fabric & TurboModules)
State Management: Redux Toolkit,Redux, Zustand, Context API
APIs: REST APIs, OpenAI API, Axios, Gen AI (LLM Integration)
Security: SSL Pinning, Root/Jailbreak Detection
Mobile Features: Deep Linking, Push Notifications, Firebase Crashlytics, Google Maps, Biometric, Social Logins
Testing: Jest, React Native Testing Library
Monitoring: Sentry (Error Tracking & Performance Monitoring)
DevOps: GitHub Actions, Fastlane, CI/CD, Automated Build & Release
Methodologies: Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Coforge Ltd., Noida

June 2021 – Present

- Increased app stability by **30% by eliminating memory leaks**, optimizing renders, and restructuring component lifecycle flows.
- Reduced app launch time by 25% through bundle optimization, memoization strategies, and FlatList virtualization tuning.
- Implemented banking-grade mobile security (SSL pinning, jailbreak/root detection, cert validation), reducing security vulnerabilities by 100% in audits.
- Built AI-powered chat module using OpenAI APIs, improving task automation and **user engagement by 40%**.
- Designed scalable Zustand + Context API architecture that reduced state update lag by **60% across complex screens**.
- Partnered with UX, backend, QA and product teams to deliver features that contributed to 20% higher user retention YoY.
- Automated the entire mobile release cycle using GitHub Actions + Fastlane, cutting deployment time from 3 hours to 20 minutes.
- Led performance audits and delivered optimizations that improved overall app FPS from 42 to 57 under heavy UI screens.

React Native Developer — iGent Digital Solutions Pvt. Ltd, Noida

Jan 2020 – May 2021

- Delivered production-grade React Native apps with 95%+ crash-free sessions and multi-platform parity.

- Improved app responsiveness by 35% through optimized navigation stacks, animations, and async storage management.
- Implemented push notifications that drove **28% increase in user re-engagement.**
- Integrated REST APIs with efficient caching and synchronization, **reducing API load by 22%.**
- Collaborated with backend and UI/UX teams, reducing development iterations by **30% and accelerating release timelines**.

KEY PROJECT

iEngage — Enterprise Mobile Application

A high-scale enterprise mobility solution adopted across multiple business units.

- Implemented full-stack mobile security (SSL pinning, root detection), passing all internal security checks with zero vulnerabilities.
- Refactored state management using **Redux + Context, cutting unnecessary re-renders by 50%.**
- Optimized the app to handle high-traffic enterprise workflows with minimal latency.
- Set up CI/CD pipelines enabling one-click automated Android and iOS builds, **reducing manual effort by 80%.**

Tech Stack: *React Native, TypeScript, Redux Toolkit, Zustand, REST APIs, Context API, GitHub Actions*

EDUCATION

B.Tech – Computer Science

Dr. A.P.J. Abdul Kalam Technical University, Lucknow — 2019

Diploma – Computer Science

Board of Technical Education, Uttar Pradesh — 2016
